LED140

Targeted supplemental grow lighting

For zones of a natural pitch that need additional light when daylight is limited.

Placement	The system can be positioned over areas of the playing surface that need supplemental light.
In the field	Sodick Europe documents two LED140 rigs in use on warm-season grass at Peace Stadium in Nagasaki.
Planning	Discuss the shaded area, rig positioning and operating schedule with the turf team. Ask Sodick to confirm equipment dimensions, coverage and electrical requirements.
