LED400

Wide-area stadium grow lighting

For larger areas of natural sports turf affected by shade or low seasonal daylight.

Lighting and heat	Sodick describes a system combining LED lighting with infrared units to manage light and temperature.
Engineering	Sodi-Tech describes the LED400 as designed and manufactured in Japan and shows it at Nagasaki Stadium City.
Planning	Share the area to be treated, pitch access and operating window. Ask Sodick to confirm coverage, dimensions and site power for the quoted system.
